

The Day is a daily online news service which students can use in school and at home. Journalists working at The Day write at least 2 news reports and features every day for students not just in the UK but around the world.

Accessing the news is a weekly activity during Form time and an opportunity for students to discuss topical news stories with each other as well as their Form Mentor. In addition, all our students have free access to The Day at home directly from the school portal page and we encourage our students to discuss stories at home with their families.

All news stories are linked directly to multiple curriculum subjects and our students can browse at leisure through the back catalogue of thousands of articles, sorted for them by subject. The Day helps all students form the regular habit of spending a few moments making the connection between the world of school and the wider world around them, thinking for themselves, reflecting upon current affairs and forming informed opinions.
